

CARVANA

11/22/19

To Whom It May Concern,

This is a letter of recommendation for Boyle Construction Management Inc. (BCMI) based on their successful completion of our new Inspection Center project in Greenfield, Indiana. BCMI not only stood out to Carvana as a great construction firm, but also most importantly as an excellent Design Build partner. This facility is one of the first of its size for Carvana, and BCMI and its design team took the time and effort to help Carvana understand our own needs to develop, design, and build our new flagship Inspection Center.

Boyle Construction Management Inc. was faced with an extremely aggressive construction schedule to have us open as quickly as possible to start production. BCMI not only met this difficult schedule, turning over the facility on time, but also successfully worked through all issues that arose with an open and honest approach. Even with this difficult schedule, BCMI made sure that quality of their work never faltered. Carvana prides ourselves on the quality of the used cars we deliver to our customers. Seeing the attention to detail and high standards of quality that BCMI had, made us feel as though we selected the right contractor who aligned with our values and delivered a great product.

BCMI always had a proactive approach during the project, from the preconstruction to closeout phase. They worked with the local jurisdictions, all of our many equipment vendors, and our various operating groups to make sure the project went as smooth as I have seen. The success of our Inspection Center in Greenfield would not have been possible without the efforts of Boyle Construction Management Inc. and we look forward to working with them in the future as a trusted partner.

Sincerely,

Matthew Siemsen
Real Estate Project Manager
